

Torrance Public Library Presents

Take and Make Paper Rockets

Celebrate Los Arboles Park and the famous rocket!

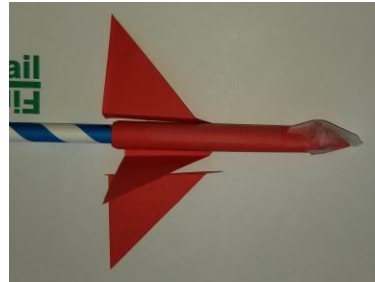

Create paper rocket ships! Make two types of paper rocket ships.
Launch each rocket with a puff of breath. Which will fly further? Which
will amuse the pets more?

Each kit has two straws and two pieces of paper. You will also
Need some tape and a pair of scissors, not included.

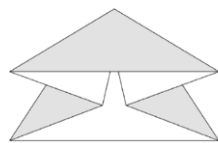

Rocket One: "The Interceptor"

1. Take one piece of paper and cut it about $\frac{1}{4}$ length, then roll it around a straw. Tape close.
2. Cut out three fins using the corners of your piece of paper. Cut four small incisions for the nose cone. Twist nose cone closed and tape, make sure tape covers the nose cone for best seal. Attach fins. Insert straw---FIRE!

Rocket Two: Origami Rocket

1. Use square piece of paper and fold in half lengthwise and diagonally. Fold so you have a pyramid.
2. Fold corners to the center twice for each four corners.
3. Fold back each corner to make fins. Insert straw---Fire!
